Water Repellent
Water-repellent finish on the material prevents liquid penetration.

Slide-in System
Perfectly balanced for every season and ocasion with a layered temperature neutralization system that regulate temperature.

Natural Fitting
Designed to accommodate all foot types, providing comfort and stability.

Breathable
Dual support integrated into the heel promotes foot stability and protection.

Removable Insole
It's detachable to allow a deeper cleaning.

Technical Standard

CE
Regulation (EU) 2016/425.

Materials and Technologies

The **PROCOMFORT™** Tecnhology, with a unique combination of design and materials, makes walking and standing feel natural again, with a perfect balance between adaptability and rigidity to provide stability and comfort along the journey.

SWIFT LS is equipped with a fully integrated **SLIDE-IN™** system, allowing you to put on and take off the sneaker quickly and without using hands. It offers high practicality without compromising the security of the fit, ensuring continuous comfort throughout the day

SWIFT LS is equipped with the **NEOFIT™** Tecnhology, an elastic adjustment system that's designed to provide immediate adaptation to the foot, without the need for laces.

SWIFT LS is made with **FEELITE™** technology. This technology is super lightweight and provides odor resistance, inhibits proliferation of bacteria and is non–toxic.

Care and Cleaning

For proper shoe care, gently remove dirt with a soft brush. Clean other stains using a sponge or a damp cloth in a mixture of water and a few drops of laundry detergent or mild soap, then rinse with water. Let the shoes dry in the shade, in a ventilated area, away from heat sources, and remove the insoles to allow them to air out. Do not machine wash.

Attention

To preserve the look and performance of your shoes for much longer, it is essential to follow some recommendations: Avoid getting your shoes wet, but in case this occurs, never place them in the sun. Let them dry in the shade and also away from any other source of heat, because heat damages the materials, the colour and the texture. A soft cloth is the main ally of this type of shoe and its cleaning should be done weekly or whenever necessary.
